

# REDCLIFF REVIEW

VOLUME I

REDCLIFF, ALBERTA, SATURDAY, AUGUST 12, 1911

Number 31

## WESTERN CANADA

Present Prosperity and Future is Well Anticipated By the Monetary Times.

Under the caption, "Western Canada," the Monetary Times of Toronto discusses this section of the country. The view of that publication will be of general interest.

"Prospects in Western Canada are excellent. The optimism of the private business is as pronounced as ever, and supported with substantial business conditions. Conservative prophecies agree on a yield in the west of 20 bushels of wheat per acre."

Under the caption, "Western Canada," the Monetary Times of Toronto discusses this section of the country. The view of that publication will be of general interest.

## THE PUMP NEVER MISSED A STROKE

Jack Rutherford, the city pumpman, felt that the quiet monotony of his river bank existence had terminated for good Sunday morning, and after the big noise for a time was unable to distinguish whether the rattled tones were echoes from the angelic choir or air waves playing on his eardrums.

After careful inspection Jack was happy to realize that he was still on earth, his hand on the engine stop cock, and no more serious results than a "busted" pipe connection with the compressed air tank, the concussion of air caused by the mild disturbance pushing the right air through to the other side of the pump.

The ear was soon adjusted, the steam traction engine once brought into use and the pump went on without missing a stroke.

Jack knows his job alright.

One and a half million dollars of foreign capital is invested in Canadian bank shares.

## HARVEST HANDS ARRIVE EARLY

Nine Thousand Harvesters in Points East are Furnished Work by the Railroads

Premature harvest excursions are responsible for an embarrassing situation at Moose Jaw, where nine thousand harvesters have arrived from points east, too early for the season.

The men are being sent back as rapidly as possible and municipal governments, railroads and various organizations are doing everything to prevent possible disturbances.

"The railway company will provide work for every man who applies for it until the harvest is ready," said one official, and scores of laborers were turned out in that way.

That the men were brought in a little earlier than needed is to be due to adverse weather conditions that have prevailed. The men will be taken to points where they can work for the company until the crop is ready and then all they will have to do is to climb over the fence into this harvest field.

## 1910 WHEAT FIGURES

Final returns of last year's wheat crop show a total of 132,240,000 bushels of 1910 wheat, which is worth, at 25¢ a bushel, \$33,060,000. The total wheat crop of 1910 was 132,240,000 bushels, or 1,000,000 bushels more than the crop of 1909.

## MONSTER ELEVATOR FOR MONTREAL

In order to clear as much as possible the grain congestion in Montreal port, the harbor commissioners are erecting an extension to the grain elevator.

The extension will be a storage elevator and will have a capacity of 500,000 bushels. The new elevator when finished will accommodate 1,775,000 bushels, and when both elevator and extension are complete, the port will have a total elevator capacity of 5,000,000 bushels.

## THE SAFE IS OPEN

Inspector of Winnipeg made that stubborn lock in the bank safe to yield Sunday, after coaxing it a hour and a half. He said the necessary adjustment in the combination and no difficulty is experienced in re-opening at the bank during banking hours.

## "DOO" WON'T MISS THE SUNDAY BAND CONCERTS

G.T. (Doc) Hall, the druggist and postmaster, has been ordered a very fine position in Winnipeg, but so far reasons given to miss the Sunday evening band concerts in the "Hut" is too much of a sacrifice.

## SMALL BLAZE AND LITTLE DAMAGE AT BRICK PLANT

A small blaze at the brick plant a few nights ago created a little excitement for a time but the fire was extinguished before more than slight damage was done.

The total immigration to Canada for the current calendar year will reach 400,000.

There are 2,547 branches of Canadian banks, 113 of which have been opened in the past six months.

There is a increase in the growth of flax in Canada of 300,000 acres over last year. The largest increase is in the province of Saskatchewan.

The London Free Press says: The action of the United States senate has been the question of the ratification of the agreement in the hands of Canada.

Canadians, therefore, are faced with a duty to their country, to themselves, to their children and their children's children—a duty in performance of which they may be counted upon to fail not.

## HON. C. A. MAGRATH, M. P., HOLDS MEETING HERE

Reciprocity, Railroads, Government Land Policy and Personal Services of the Sitting Member are Discussed

The political meeting at Davidson's hall Wednesday evening was a Magrath meeting, no party lines being drawn so far as it was possible to have it, and no "parliament" issue being advanced except it be the sitting member in parliament.

The attendance justified the criticism that Canadians do not take enough interest in the political affairs of the country.

Hon. C. A. Magrath, M. P., and candidate for re-election, was the speaker of the evening and discussed at length a number of subjects, including a discussion of himself and his position on the several issues involved. He answered the charge of corruption by denying any connection whatever with Canadian corporations such as might be especially interested in the personal of parliament and declared that his sole purpose in going to three years a sitting member has been to act solely in the interests of the people who elected him. He asserted that he has no corporation do his thinking for him.

Mr. Magrath justified the election of the reciprocity treaty on the ground that it had not so much as been mentioned in the last campaign and was not an issue that the party had been entered into and requested for acceptance at the party proper consideration and he felt with others that there should be no mistake in going to the people with such a question; adding, however, "If you want reciprocity, don't vote for me, because I won't vote for it."

The address was lacking in argumentative illustration of

## WATER POWER DANIELZ HOPEFUL

The Conservation Commission Will Determine Force of Mountain Streams

In the task of every water power accessible in the Rockies and along the streams of eastern E. C. and western Alberta, to ascertain their possibilities to be used, power at low cost and for the purpose of having information at hand for future reference, James W. Danielz, secretary of the Conservation commission, Ottawa, has gone to the mountains with two assistants.

While one sort of record has been obtained in the past of the possibilities of these streams, superficial investigation has proved that many of them were not correct.

Respecting the policy of the conservation commission Mr. W. Danielz declared the department had been thoroughly informed and their summer program was being carried out calmly and arranged. Next year's program has not yet been determined and will not be touched until he returns to Ottawa.

## COAL DEALERS NOW WANT BACK ACTION

Hon. Frank Oliver in accordance with request presented by a number of Winnipeg coal dealers has wired to Ottawa to hold off the reduction of the duty on coal imported into western Canada will not be made retroactive.

A number of dealers have laid in a large stock of coal against a possible shortage, on account of the trouble of the western mines and had paid duty. The railways have laid in quantities of coal which are still in the hands of the dealers and they will be released free of duty according to the order-in-council. The apparent intention they declare will be made retroactive to those who have the coal on hand.

Fire losses for July are estimated at \$2,823,300 in Canada, compared with \$1,152,100 for June and \$3,806,600 for the corresponding month last year. Forest fires were responsible for the large losses.

## BROWN'S IN TOWN—THE NEW PHYSICIAN

Dr. E. W. Brown has arrived at Redcliff for the practice of his profession, and has temporarily established his office at the corner of Broadway and Main streets in the building formerly occupied by the Ireland store.

## NO DAMAGE FROM RUST

Expert Reports Show Its Presence But Grain Is Good and the Yield will be Heavy.

The first batch of reports from the secure of more of men sent out by the Winnipeg Free Press to inspect crops in Manitoba, Saskatchewan and Alberta, are decidedly encouraging. The number of men report black blight present is generally in a district sufficiently far advanced to make the depression of the crop negligible.

It is feasible that very many of the reports indicate that it will be ten days to two weeks yet before cutting is general, and practically every report indicates that the situation hinges on the yield of the crop.

The only report from Alberta is from the Taber district. Cutting there will be general in a few days. Straw is bright and there is no indication of black blight for the next two weeks.

The only report from Alberta is from the Taber district. Cutting there will be general in a few days. Straw is bright and there is no indication of black blight for the next two weeks.

There are about 90,000 acres in wheat, tributary, the yield will be 20 bushels. There is about 4,000 acres of winter wheat with 2,000 acres destroyed by blight. Oats are a good crop, about 15,000 acres, which will yield about 55 bu., not so far advanced as wheat. There are 2,000 acres in barley, the yield will be 10 bushels. Flax is good, 4,000 acres, yield 15 bu.

## GOVERNMENT AGENT WITH EDITORIAL ASSOCIATION

Edward T. Holmes, Canadian government agent at St. Paul, who accompanied the Ohio Editorial Association through Canada, spent Wednesday in Redcliff. Mr. Holmes is a most active agent, a believer in the future of Canada, and shoots and long for reciprocity.

## GLASS WORKS CONSIDERED BY LARGE MANUFACTURERS

L. G. Taylor, the glass expert who spent some weeks in this vicinity making tests of glass sands, left Sunday for his home in New Jersey. The purpose now is to interest eastern capitalists in the establishment of glass works here, and on a much larger scale than at first proposed.

The matter is under advisement with men who are already in the business and who are likely to establish a branch here, with some measure of support from Calgary and other local capitalists.

More than ten thousand visitors passed through the town gates at the Dominion fair at Regina Wednesday.

## BREVITIES

D. Danforth of Orangeville, Ont., paid Redcliff a visit this week.

Walter Lumsdell, F. Lipper and A. Price of Calgary were hotel guests Wednesday.

"Rocky mount" while "Doc" Redcliff the government and the Almighty are all with you here.

A. J. Wallace of Bowell and A. E. Wallace of Calgary, Saskatoon, were Redcliff visitors Monday.

C. B. Saxton, Winnipeg, H. Curtis and W. B. Riede of Medicine Hat were guests at the hotel Redcliff Monday.

E. H. Sellhorn and family now occupy a cottage on Main street, their household goods having arrived early in the week.

A. E. Farmer, manager of the Imperial bank branch at Medicine Hat, spent Tuesday here, having just returned from a business trip to Ottawa.

## U. F. FARMERS ARE OPPOSED TO TREATY

As bearing upon the reciprocity question the following statement relative to the views of the American farmers will be of interest.

"An interesting review of the large free movement of wheat to the United States primary centers is given by John Inglis, the well-known American expert. Mr. Inglis avers that the fear of reciprocity is bounding the farmers to sell early, arguing that, if the Canadian wheat raises 20,000,000 bushels, the United States will be used as the dumping ground for Canadian wheat. The farmers, he says, are really opposed to reciprocity, and the continuous diversion of the great Canadian crop, and the possibility of its coming in direct competition with the American crop, is a serious matter to the farmers to sell more freely than in former years."

## WHAT TO SAY ABOUT REDCLIFF

Redcliff is situated on the C. P. R. six miles west of Medicine Hat, on the banks of the Saskatchewan river.

Natural gas is probably Redcliff's first and greatest asset—meeting the requirements of an great a demand as may be made for manufacturing purposes.

Working coal mines on both sides of the river, and immense deposits cropping out yet unexplored.

Brick and other clay products are manufactured extensively and additional enterprises for this line of industry are in contemplation.

The business houses and residences are practically all of brick—home products.

Slits emulsoids, tests of which have proven an excellent quality for glass making.

Industrial sites are donated to new enterprises.

Surrounding territory is in the heart of Alberta's wheat belt, and there are more prosperous farmers in the world than here.

Redcliff already has—

A flour mill that will handle 200,000 bushels of wheat—Redcliff and Bowell wheat crop this fall.

A well equipped foundry, machine shop and planing mill in operation.

A plant for making brick and clay products, the demand for which is increasing constantly.

One protestant church.

A fine, new, thoroughly modern brick school house.

An excellent gas lighting system, and mains laid throughout the city.

An assessed valuation of more than half a million and a municipal tax levy of eight mills.

As fine a three-story modern brick hotel as there is in west.

A perfect system of water works—water pure as the mountain springs.

Redcliff is yet less than five years old, with a variety of institutions engaged in practically every line of business.

What is needed now is capital to utilize the natural and bounteous resources—abundant prosperity awaits that combination with certainty.

## H. S. IRELAND

### General Merchandise

Just received a shipment of Ladies' Wear.  
Here are a Few Special Items:

Ladies' plain and fancy hosiery, assorted colors.....	25 to 50c per pair
Children's stockings, made to stand holiday wear.....	20 to 30c

## ANENT CHANGES IN THE CABINET

The cabinet changes prior to election are not numerous unless there are more to come. Dr. Deland replaces Mr. Brodeur, who goes to the supreme court; and Mr. Gendry is to succeed Mr. Allyn Aylesworth. The government probably gains in political efficiency, both the new ministers are noted campaigners, but it loses something as well. Both the retiring ministers are of heavier calibre than their successors. Mr. Brodeur has been given the credit that really belongs to him. He inherited a department that had been badly managed for 20 years; and he had to pay the scores of his predecessors. Mr. Gendry is a realistic, a man of sense, fair abilities and of the finest character—just and clean and honorable. He will make a first-rate judge.—Free Press.

## COUNCIL AIDS LABOR DAY CELEBRATION

A delegation from the Medicine Hat Trades and Labor council waited on the city fathers with a request for a grant in aid of Labor day sports, being planned. It was the intention to have the grant pay all the expenses of the day and not collect from the business men of the city as was done last year.

The council expressed their approval of the manner in which the program was handled last year, and a grant of \$500 for the day was passed by the council, all they could possibly give.—Times.
